

# Maintenance Plan

Keep photo diary

Use Google Forms to collect data

Write up a report every year

Record dates for each heap

- When heap was started
- When it was full
- When it was turned
- When it was ready
- Temperatures at all these points and at other regular intervals
- Volume of end-product
- Where the end-product was used and how it performed

Write key info on the systems themselves – especially on the one-turn system.

Make visual checks each week to make sure they are safe and appropriate for use.

After a year, assess if the site needs more composting systems (perhaps one in the area of the old raised beds).
